

IG-1800

Intercommunication
Speak through intercom

Made in
France

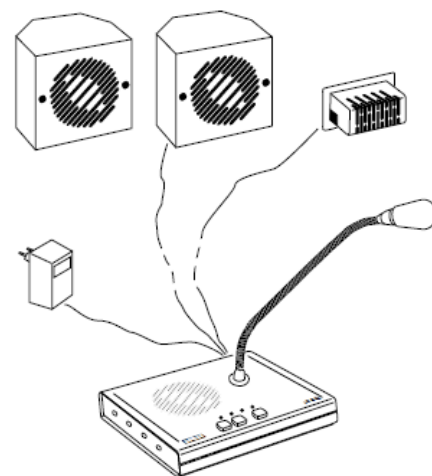

- Integrated microphones
- Integrated loudspeakers
- Anti-feedback filters
- Easy installation

Intercom **IG-1800** is ideal for closed windows.

This intercom is made of a microphone console and loudspeaker on window side and a microphone sensor and loudspeaker on public side ; it therefore makes easier message transmission between speakers located on each side of a glass or plexiglas wall.

This complete intercom kit is also provided with anti-feedback filters.
